WIRELESS INNOVATION FORUM™

WInnComm 2017

13-17 November 2017
San Diego, California

The Wireless Innovation Forum Conference on Wireless Communications Technologies:
Connecting technical, business and regulatory leaders ~ Defining the future of radio communications

Call For Presentations

*"WinnComm is **the** venue for facilitating discussion among stakeholders to establish or expand ecosystems in the wireless communications market, define and promote interoperability standards supporting those ecosystems, and educate regulators on associated issues."*

-- **Dr. Andrew Clegg**, *Google*

Attracting attendees from all aspects of the advanced wireless radio value chain, WInnComm is the ideal place to network and make an impact. Submit your abstract now and be a part of the only event devoted to the advancement of radio technologies from research through deployment.

This is the premier venue to network with and learn from the leading innovators in the advanced wireless market to gain a functional knowledge of relevant emerging opportunities and technologies.

WInnComm will include one technical track based on the Wireless Innovation Forum's Top Ten Wireless Innovations and related software defined radio, cognitive radio and spectrum sharing technologies in addition to a number of special sessions to be announced soon.

Presentations will be 25 minutes in duration, including questions. Presentation only is an option for those not wishing to do a full paper. Conference proceedings containing all presentation materials and any associated papers will be made available to attendees and published online for future reference. In addition to the main program, poster sessions will be added facilitate better networking between paper presenters and Forum members on all SDR, CR and DSA topic areas.

Important Dates:

Abstracts Due:	10 July 2017
Abstracts Accepted Notification:	31 July 2017
Tutorial/Demo Abstracts Due:	14 August 2017
Initial Program Announced	15 August 2017
Final Presentations Due:	30 October 2017
Proceedings available for registrants	7 November 2017

About the Conference:

In its 15th year, the Wireless Innovation Forum Conference on Communications Technologies and Software Defined Radio (WInnComm) attracts attendees that include investors, commercial network operators, radio manufacturers, system integrators, government procurement officials, regulators, engineering service providers and consultants from across the globe.

Past Attendees

- Equipment Manufacturers, Network Providers and Other Acquisition Authorities

- Investors, Regulators and Analysts

- Researchers and Technology Developers

Innovation Showcase = Target Opportunity

Are you in advanced wireless technologies, as a researcher, product developer or marketer?

Join our Innovation Showcase to reach your target market even more efficiently.

Rather rather than hosting a traditional exhibit hall, WInnComm invites you to showcase your technology and product through a series of advertised demonstrations, similar to other oral presentations. This will give you additional visibility allowing you to more personally interact with and reach your customer.

Each demonstration will be assigned and 8 by 8 "Booth" in the Demonstrations Hall. As advertised on the conference program, conference attendees will be invited, during lunch and breaks, to the Hall to see the demonstrations and discuss with you the product or technology you are showing. You are welcome to host your booth on both days should you wish (NOTE: you must submit a separate demo proposal in EDAS for each day's demo). Additional demo benefits include:

- Demos are managed via EDAS, similar to conference paper and presentation submissions allowing us to have more complete information on your technology or product in order to promote you better (see next bullet for more ...)

- Demos promoted as part of the conference program rather than a separate event, creating more cohesion between presentations and demos and more attention for your product or technology

- Register as a regular conference participant: there are no separate exhibition or demonstration fees

- The earlier you reserve your spot, the earlier we can start promoting your demo!

**Register your demonstration abstract proposal today
via the WInnComm EDAS page:** https://www.edas.info/N23633

Brought to you by Demonstrations sponsor:

Submission Guidelines

Presentations proposals for each track must include an abstract, author information, the topic area, and sufficient information to validate the quality and technical depth of the proposal. Submissions are made via EDAS: https://www.edas.info/N23633

Topic categories include:

WInnForum Top Ten Most Wanted Wireless Innovations

RF Technologies: Circuits and Devices

Baseband Signal Processing Technology and Devices

Frameworks, Middleware and APIs

Software Architecture and Design

Firmware and other Intellectual Property

Advanced Signal Processing

Waveforms

Communications System Design

System Design Tools

Wireless Network Design and Protocols

Processing platforms and programming models

Cognitive Engines

Policy Languages

Spectrum Sensing and Awareness

Spectrum Etiquettes and Coexistence

Radio Resource Management

Spectrum Management

Test and Certification

Programs Addressing These Innovation Requirements

Emerging Innovation Requirements
